## DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENT

A system to provide a team of users with intranet-based groupware functionality in accordance with an embodiment of the present invention is shown schematically in Figure 1.

The system generally comprises at least one server computer as an intranet connected server 10 which supports a TCP/IP protocol and which has input and access capabilities via two-way communication lines, such as communication lines 15 and 20. The computer is configured as a web server. Server 10 has a unique resource locator (URL) address and comprises a means to create a dedicated intranet site 25 (e.g. Site #4) on the server in response to an initiate request received from a primary user 30. Dedicated site 25 has a unique address which identifies it with the primary user 30 (e.g., #4) within server 10. Server 10 further comprises a means to send information, including its URL address and the unique address of the dedicated site, to at least one secondary user 40, nominated by the primary user 30.

Both primary user 30 and secondary user 40 can communicate with server 10 by means of an HTML compliant client supporting a graphical user interface and internet browser, such as Netscape Navigator or Microsoft Explorer, i.e., there is no requirement that either primary user 30 or secondary user 40 have access to specialized software applications in order to utilize the system of the present invention. Information on the site 25 is credited as a hypertext document and is thus displayed as a web page on the GVI of the user's web browser, with a link to this hypertext document.

Once connected to dedicated site 25 created on server 10, primary user 30 and secondary user 40 both have access to at least some of the information stored at the site, the ability to access and process at least some of the information and the ability to input and store processed and/or new information. All the specialized software which provides the functional requirements to give primary user 30 and secondary user 40 these abilities is provided by server 10 via dedicated site 25. Once again, primary user 30 and
